

INTRODUCTION TO 12REPS STRENGTH AND CONDITIONING PROGRAM FOR RUNNERS

Running is one of the most effective ways to boost your mental and physical well-being. It strengthens your cardiovascular health, builds endurance, and energises your mind through stress relief and focus-enhancing endorphins.

But running alone isn't enough. Without strength training, many runners face slower progress, higher injury risks, and limited mobility. That's why a tailored strength program is essential to maximise your potential and improve running mechanics.

At 12Reps, our trainers have designed a science-backed strength and conditioning program specifically for runners. Using single-leg exercises, core activation, and explosive movements, we help you tackle common challenges and unlock your peak performance.

Here's what our programme can do for you:

- 1 Faster running times.
- 2 Reduced injury risk.
- 3 Greater confidence and smoother strides.
- 4 Improved anaerobic capacity.
- 5 Enhanced muscle-to-fat composition.

Key Notes

- 1 **Warm-Up:** Each session should begin with 5-10 minutes of dynamic stretching and mobility work (e.g., leg swings, arm circles, inchworms, world's greatest stretch, pigeon stretch, four figure stretch).
- 2 **Progression:** Increase weights or reps every 1-2 weeks as strength improves.
- 3 **Cool-Down:** Spend 5-10 minutes stretching and foam rolling after each workout.

General Structure

- » **Monday:** Lower Body Focus (Single-Leg Stability and Power)
- » **Wednesday:** Upper Body and Core (Single-Arm and Rotational Strength)
- » **Friday/Saturday:** Full-Body Functional Strength (Combination of movements, balance, and plyometrics)

Progression Plan

- » **Weeks 1-4:** Build foundational strength and form.
- » **Weeks 5-8:** Increase load and intensity with moderate volume.
- » **Weeks 9-12:** Focus on power, explosive movements, and reducing rest for stamina.
